

Adhesive Protector Foam

Building / Surface Protection

- High-density foam
- Strong adhesive backing
- Easy to cut to size and shape

GREAT FOR CAR DOOR PROTECTION IN TIGHT GARAGES

Whites Adhesive Protector Foam is a high-density foam roll with an adhesive backing. It adheres to any smooth, clean surface, such as concrete, timber and steel.

It's ideal for use on garage walls and pillars as a bumper to protect car doors from dents and scratches.

With a thickness of 4mm, it's also suitable for floors as anti-skid and surface protection.

Made from recycled material.
