DECORATIVE PLANTERS WITH NATURAL EARTHY TONES

Alfresco living planters for entertaining

Whites Oxy-Shield Casa Series Planters create a unique look and are ideal for every part of your home's outdoor areas due to their versatile size and contemporary styling. A great decorative garden feature, the Casa Series is perfect for luscious green plants or bright and colourful flowers.

Available in a range of sizes, these planters are supplied with drainage holes and caps. Simply add or remove caps for water drainage.

Also available in [Cafe Series](#) and [Copa Series](#).

About Oxy-Shield

Oxy-Shield is a specially formulated landscaping steel designed to impart a decorative rust-look without the inherent degradation of regular steel. The surface oxidises to form a protective coating resistant to corrosion and flaking - a durable long-lasting steel.

Rustic tones will further develop and enhance over time; to accelerate the effect, spray regularly with a fine mist of water. With a rich, earthy patina - a favourite amongst landscapers, it blends effortlessly into any backyard or courtyard setting.

*18487 comes with metal insert

Handy Hints:

- **Planting:**
For direct soil planting, line the bottom of the planter with 50-100mm of wood chip or gravel before filling with soil. Alternatively, place a potted plant directly inside, ideally with a water-well base for indoor use.
- **Safety** - Once filled, the planter may be extremely heavy so make sure you have it where you want it before you fill it up.
- **Position carefully** - Rust run-off can stain surrounding areas.
- Always wear protective gloves and glasses during installation.
