

Garden Post

Fencing Solutions / Garden Posts

- Lightweight steel post
- Easy to hammer in and hook up
- Specially designed lug
- Makes it easy to attach mesh and netting
- Powder coated for corrosion resistance
- Federation green colour blends into garden decor

UNIQUELY DESIGNED POST

Whites Garden Post is a versatile solution available in two heights. Ideal for use as a tree stake, garden fencing post or for extending paling fence height, they can be hammered into the ground or mounted with screws or nails through pre-drilled holes.

The specially designed lugs allow you to easily hook up mesh and netting over the top, upward facing lugs. The mesh and netting is then further secured by pulling down to hook snugly onto the bottom, downward facing lugs.

| Code | Product Description | Size |
|-------|---------------------|--------|
| 10720 | Garden Post | 1700mm |
| 10721 | Garden Post | 1000mm |
